

# Victor Bucar

## Software Engineer

### Profile

FullStack developer with experience in analyzing, modeling and developing modern web applications mostly on governmental institutions, working in a wide range of management and decision-making process.

Ability to think and find solutions to problems with confidence. Constantly updating my skills and competencies as a passionate, ambitious and motivated team player.

Looking for a software development opportunity that will offer the chance to work alongside experts, helping in a career progression to further levels.

Working with analyst programmers, full stack developers, software architects, and customers. Responsible for ensuring software quality, analyzing and developing internal web and desktop applications following best practices.
